

# Digital Surveillance System

DSS Express Video Management System

- Supports 256 IP Cameras
- Supports 256 Video Intercom Devices
- Integrates All Management Functions into One Client
- · Allows Device Initialization and Management
- · Live Video Playback from Edge Device
- Supports Thermal and Flow Control Solutions
- Supports Access Control and Video Intercom Integration
- Offers Fisheye Camera Dewarping on Live View
- Offers Facial Recognition and Search on Live View

## **System Overview**

The DSS Express Video Management System is a powerful, all-in-one video surveillance management software for system scalability and reliability. The DSS Express supports up to 256 network cameras and 256 Video Intercom devices, with the ability to integrate multiple access or video intercom devices.

DSS Express provides user rights management, device management, alarm management, and two-way audio. In addition to these VMS features, DSS Express offers advanced features, including support for real-time face recognition and robust event management controls.

## **Functions**

#### Flexibility and Scalability

DSS Express supports 256 IP video channels, with support for eight (8) connected face recognition cameras. DSS Express also supports 256 Video Intercom Devices (SIP-enabled), and offers features to manage and control access control devices.

## Compatibility

DSS Express is compatible with all Dahua IP-enabled devices: network cameras, NVRs, DVRs, video intercom devices, and access control devices. The server is also compatible with the ONVIF protocol, so it can connect to ONVIF-enabled third-party devices.

## Fisheye Camera Support

The software features full support for Dahua Fisheye cameras. The software supports options for the Fisheye camera installation and offers dewarp modes. Dewarping solves the problem of distortion in the circular panoramic view in both live or playback modes.

## Real-time Face Recognition

The DSS Express performs real-time facial recognition on up to eight (8) channels simultaneously. The software captures and analyzes facial features to determine gender, age, expression, glasses, moustache, and mask, and then can record the faces and store the associated structured data. The server also filters incoming video to display faces that match target features.

## Access Control and Video Intercom

DSS Express offers full support and integration for access control and video intercom products to support a complete security and surveillance system. The server monitors door status and events, manages access rights, and support advanced rules management. In addition to access controls, the server supports two-way communication between intercom and control center.

## **Management Operations**

The software manages the devices and the user accounts for an entire organization. Operators can assign different camera ranges, active use periods, and business roles for each user. The server also supports different schemes for various events, including IVS, to record and view all event history information.

## **System Features**

#### **General Functions**

#### Organization and Group Management

#### Device Management

- · Initialize Dahua devices
- · Add devices via auto search and IP Address
- Supports IP, P2P, ONVIF
- Manage Dahua devices

## Users Management<sup>1</sup>

- · Add, edit and delete users
- · Assign appropriate permissions to specific users
- · Restrict user access by MAC and expiration dates

#### Storage

- Central storage: local disk storage and extended storage via iSCSI
- Add. edit. delete, enable and disable the record plan
- Supports edge storage and central storage for record plan

NOTE: Video and image recordings cannot be on the same physical hard drive. Separate physical drives are required for video and image storage. System hard drives are only for DSS software installation.

#### **Bind Access Control Channels**

#### Playback

- · Playback recording from edge devices
- Apply video filters: normal, motion, alarm, video loss, video tampering
- · Sync play
- · Reverse playback
- · Playback frame-by-frame
- Slow and fast forward playback (1/64x to 64x speeds)
- Lock or mark important recording segments for central storage
- Supports Smart Search

#### Emap

- Use raster map, main map, and sub-maps
- Supports 8-level sub-map
- Add, edit, and delete hot spots (camera, alarm input) on the map
- View live video and playback on the map
- Zoom in and zoom out the map
- Supports visible range and initial angle
- Icon flashes on map when alarm occurs

#### Live View

- Displays device tree, device IP Address or device name
- Control PTZ cameras
- Set manual recording
- Take Snapshots
- Apply Fisheye dewarping
- Audio talk
- · Set alarm window
- Set Region of Interest: divide one window into 4 or 6 parts, one shows whole image and others show details
- Supports Four (4) Live View tabs
- Save current split as a view
- Add channels as favorites
- Video tour according to device, organization, favorite or view.
- View map via live view window

#### **Event Management**

- Detect device exception, video events, alarm input, access control Events, etc.
- Set alarm scheme: all day, weekday, weekend, or custom template
- Set alarm priority: Low, Medium, High
- Link recordings, snapshots, live video, alarm output, PTZ actions, or e-mail
- Add, edit, delete, enable, and disable alarm schemes
- Display event info including alarm time, alarm name, alarm status, etc.
- View live video or pictures from a related camera
- · Acknowledge events
- · Arm control for events
- Forward alarm to relevant users
- Send e-mail when processing events
- Process events
- Search events

#### **Download Center**

- · Download recordings from an edge device
- Download recordings by timeline, files, or tags
- Supports multi-task download
- Supports .dav, .mp4, .flv, .asf, and .avi video formats

## Intelligent Building Functions

#### Personnel Management

- Add, edit, and delete people and departments
- Issue card credentials or fingerprint via USB reader or device
- Authorize by door or door group
- · Issue private passwords and face authentications
- · Manage guest, VIP, and normal personnel management

#### Access Control

- Monitor door status and events
- Group door access levels
- · Manage access rights
- Lock/Unlock doors with one key
- · Link fire detection devices
- Set advanced door rules: anti-passback, first card unlock, inter-door lock, multiple card unlock, remote verification

#### Video Intercom

- Supports Video Intercom devices based on SIP protocol or with command center
- Release text information to VTH series devices
- Release address book to VTO series devices

## Vehicle Entrance/Exit Management

- Edit parking-lot, includes total and available spaces, parking name etc.
- Manage owners, vehicles and cards
- Bind LED screen with ITC or spot detector device
- Open the barriers via VTO with cards or remotely
- Force existing vehicles to leave
- Search and export the historical pass records
- Supports daily, weekly, monthly, and annual statistics of vehicle entrance

## Analytics+

#### Face Recognition

- Perform face recognition
- Search for faces in live video using similar face or feature search
- Prepare structured reports of gender and age
- · Manage face library

## System Maintenance

#### Logs

- View operator log and door log in control client
- Search and export logs

## Backup and Restore

- Backup system data automatically (daily, weekly, monthly)
- Backup system data manually
- Restore system data from server or local file

## Other Functions

- · FTP for alarm pictures
- Calibrate device time and server time

A remote client login to a DSS server is supported only via an IP addresss. DSS does not support remote login via DDNS.
