

the fire beam™
protection system Xtra

the fire beam™
protection system Xtra

thefirebeam™ protectionsystemXtra

how far do you want to go?

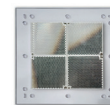

← **70 metre range** →

the standard firebeamXtra uses **one reflector** and will cover up to 70 metres

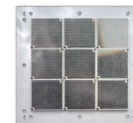

← **140 metre range** →

add the 70KIT140 to the firebeamXtra and cover distances between 70 and 140 metres

← **160 metre range** →

add the 140KIT160 to the firebeamXtra and cover distances between 140 and 160 metres

the industries favourite beam detector is now the worlds **longest reaching reflective beam** meaning less beams and **less expense** not only in hardware but also in **reduced installation costs**
add to this intelligent **self-aligning motorisation** and the ease of a **ground level controller** the firebeamXtra really is the go to beam if ease of use, proven reliability and cost reduction initiatives are required

winner
of the fire industry award for innovation
