Series Overview

The Device is a layer-2 commercial switch. It has a high-performance switching engine and a large buffer memory to ensure smooth video stream transmission. With a full-metal and fanless design, the Device features great heat dissipation capability on the shell surface. The Device is an unmanaged switch, so it does not need to be configured through web interface, which simplifies installation.

Functions

Plug and Play

Hassle-free, it does not require any configuration. Simply use after it is powered on.

Wide Operating Temperature (-20 °C to +60 °C)

With its metal housing, it has great heat dissipation and a wide operating temperature that ranges from -20°C to +60°C.

Fanless Design

The fanless design reduces noise, enhances user experience, reduces mechanical losses and improves service life to a certain extent.

Optimized Performance

All ports can transmit streams at high speeds without delay.

Scene

Suitable for small-scale scenes such as offices, schools, hotels, supermarkets, and hospitals.
